

Lenape Names of Wooden Items

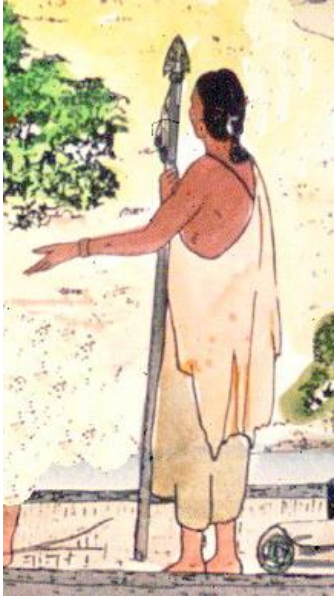

These are names and photographs of some of the things made of wood by the Lenape or Delaware Indians. In this group we have limited the selection to mostly types of things made before the introduction of metal tools. Later wooden items can be found in the other lists like Tools, and Things in the Kitchen. In the first column there are links in blue that can be clicked to take you to the Lenape Talking Dictionary (www.talk-lenape.org) where you can hear the Lenape name of the tool. In the third column enclosed in " " is the literal translation of the Lenape name.
